

Publication List (November 2014)

PIERRE LE DOUSSAL

Directeur de Recherche de Classe Exceptionnelle (DRCE1)

*Laboratoire de Physique Théorique
de l'Ecole Normale Supérieure,
24 rue Lhomond, Paris 75231 France*

Médaille d'argent CNRS 2003.

Total number of publications: 208

Total number of citations : total 6900 H- number: 40

without self-citations 5800, citing articles 4100/3900.

(Web of Science, Septembre 2014 on 206 records)

(Google Scholar gives 9200 citations, h=47 (Google))

References

- [1] **Revisiting Directed Polymers with heavy-tailed disorder**
Thomas Gueudré, Pierre Le Doussal, Jean-Philippe Bouchaud, Alberto Rosso, arXiv:1411.1242.
- [2] **An exact mapping of the stochastic field theory for Manna sandpiles to interfaces in random media**
Pierre Le Doussal, Kay Jorg Wiese, arXiv:1410.1930, submitted to Phys. Rev. Lett. (2014).
- [3] **Three universality classes for reaction fronts in disordered flows**
Séverine Atis, Awadhesh Kumar Dubey, Dominique Salin, Laurent Talon, Pierre Le Doussal, and Kay Jorg Wiese, arXiv:1410.1097, submitted to Phys. Rev. Lett. (2014).
- [4] **Avalanche shape and exponents beyond mean-field theory**
Alexander Dobrinevski, Pierre Le Doussal, Kay Jorg Wiese, arXiv:1407.7353, submitted to Europhys. Lett. (2014).
- [5] **Log-Gamma directed polymer with fixed endpoints via the replica Bethe Ansatz**
Thimothée Thiery, Pierre Le Doussal arXiv:1406.5963, J. Stat. Mech. (2014) P10018.
- [6] **From the sine-Gordon field theory to the Kardar-Parisi-Zhang growth equation**
Pasquale Calabrese, Marton Kormos, Pierre Le Doussal, arXiv:1405.2582, EPL 107 (2014) 10011. Highlighted article of the year.
- [7] **Superfluid-Bose glass transition in one dimension**
Zoran Ristivojevic, Aleksandra Petkovic, Pierre Le Doussal, Thierry Giamarchi, arXiv:1404.0678, Phys. Rev. B 90, 125144 (2014).

- [8] **Interaction quench in a Lieb-Liniger model and the KPZ equation with flat initial conditions**
Pasquale Calabrese, Pierre Le Doussal, arXiv:1402.1278, J. Stat. Mech. (2014) P05004. Highlights section.
- [9] **Crossover from droplet to flat initial conditions in the KPZ equation from the replica Bethe ansatz**
Pierre Le Doussal, arXiv:1401.1081, J. Stat. Mech. (2014) P04018. Highlights section.
- [10] **Statistics of shocks in a toy model with heavy tails**
Thomas Gueudré, Pierre Le Doussal, arXiv:1312.7541, Phys. Rev. E 89, 042111 (2014).
- [11] **Collective excitations in a large-d model for graphene**
Francisco Guinea, Pierre Le Doussal, Kay Joerg Wiese, arXiv:1312.2854, Phys. Rev. B 89, 125428 (2014).
- [12] **Non-Gaussian effects and multifractality in the Bragg glass**
Andrei A. Fedorenko, Pierre Le Doussal, Kay Joerg Wiese, arXiv:1309.6529, Europhys.Lett. 105 (2014) 16002.
- [13] **Statistics of Avalanches with Relaxation, and Barkhausen Noise: A Solvable Model**
Alexander Dobrinevski, Pierre Le Doussal, Kay Jorg Wiese, arXiv:1304.7219, Phys. Rev. E 88, 032106 (2013).
- [14] **Exact form of the exponential correlation function in the glassy super-rough phase**
Pierre Le Doussal, Zoran Ristivojevic, Kay Jorg Wiese, arXiv:1304.4612, Phys. Rev. B 87, 214201 (2013)
- [15] **Topology trivialization and large deviations for the minimum in the simplest random optimization**
Yan V Fyodorov, Pierre Le Doussal, arXiv:1304.0024, J. Stat. Phys. (2014) v. 154 (Issue 1-2) 466 - 490
- [16] **Avalanche dynamics of elastic interfaces**
Pierre Le Doussal, Kay Joerg Wiese, arXiv:1302.4316, Phys. Rev. E 88 (2013) 022106.
- [17] **Functional renormalization-group approach to decaying turbulence**
Andrei A. Fedorenko, Pierre Le Doussal, Kay Joerg Wiese, arXiv:1212.2117, J. Stat. Mech. (2013) P04014.
- [18] **Phase transitions for a collective coordinate coupled to Luttinger liquids**
B. Horovitz, T. Giamarchi, P. Le Doussal, arXiv:1211.6067, Phys. Rev. Lett. 111, 115302 (2013).
- [19] **Directed polymer near a hard wall and KPZ equation in the half-space**
Thomas Gueudre, Pierre Le Doussal, arXiv:1208.5669, EPL **100** 26006 (2012).

- [20] **Short time growth of a KPZ interface with flat initial conditions**
Thomas Gueudre, Pierre Le Doussal, Alberto Rosso, Adrien Henry, Pasquale Calabrese, arXiv:1207.7305, Physical Review E 86 (2012) 041151.
- [21] **Counting function fluctuations and extreme value threshold in multifractal patterns: the case study of an ideal $1/f$ noise**
Yan V. Fyodorov, Pierre Le Doussal, Alberto Rosso, arXiv:1207.4614, Journal of Statistical Physics **149** 898 (2012).
- [22] **Rings and Coulomb boxes in dissipative environments**
Yoav Etzioni, Baruch Horovitz, Pierre Le Doussal, arXiv:1207.2559, Phys. Rev. B **86**, 235406 (2012).
- [23] **Phase transition of interacting disordered bosons in one dimension**
Zoran Ristivojevic, Aleksandra Petkovic, Pierre Le Doussal, Thierry Giamarchi, arXiv:1205.2105, Phys. Rev. Lett. 109, 026402 (2012).
- [24] **Super-rough phase of the random-phase sine-Gordon model: Two-loop results**
Zoran Ristivojevic, Pierre Le Doussal, Kay Jorg Wiese, arXiv:1204.6221, Phys. Rev. B 86, 054201 (2012).
- [25] **Super-rough glassy phase of the random field XY model in two dimensions**
A. Perret, Z. Ristivojevic, P. Le Doussal, G. Schehr, K. J. Wiese, arXiv:1204.5685, Phys. Rev. Lett. **109**, 157205 (2012).
- [26] **The KPZ equation with flat initial condition and the directed polymer with one free end**
Pierre Le Doussal, Pasquale Calabrese, arXiv:1204.2607, J. Stat. Mech. (2012) P06001.
- [27] **Distribution of velocities and acceleration for a particle in Brownian correlated disorder: inertial case**
Pierre Le Doussal, Aleksandra Petkovic, Kay Jorg Wiese, arXiv:1203.5620, Phys. Rev. E 85, 061116 (2012)
- [28] **Nonstationary dynamics of the Alessandro-Beatrice-Bertotti-Montorsi model**
Alexander Dobrinevski, Pierre Le Doussal, Kay Jorg Wiese, arXiv:1112.6307, Phys. Rev. E 85, 031105 (2012).
- [29] **First-principle derivation of static avalanche-size distribution**
Pierre Le Doussal, Kay Joerg Wiese, arXiv:1111.3172, Phys. Rev. E 85 (2012) 061102.
- [30] **Equilibrium avalanches in spin glasses**
Pierre Le Doussal, Markus Mueller, Kay Joerg Wiese, arXiv:1110.2011, Phys. Rev. B 85 (2012) 214402 (editor's suggestion)
- [31] **Shock statistics in higher-dimensional Burgers turbulence**
Pierre Le Doussal, Alberto Rosso, Kay Joerg Wiese, arXiv:1104.5048, EPL **96**, 14005 (2011).

- [32] **Distribution of velocities in an avalanche**
 Pierre Le Doussal, Kay Joerg Wiese, arXiv:1104.2629, EPL 97 (2012) 46004 (editor's choice, best of 2011)
- [33] **An exact solution for the KPZ equation with flat initial conditions**
 Pasquale Calabrese, Pierre Le Doussal, arXiv:1104.1993, Phys. Rev. Lett. 106, 250603 (2011).
- [34] **Zero temperature geometric spin dephasing on a ring in presence of an Ohmic environment**
 B. Horovitz, P. Le Doussal, G. Zarand, arXiv:1104.1637, EPL 95 (2011) 57004.
- [35] **Rings and boxes in dissipative environments**
 Yoav Etzioni, Baruch Horovitz, Pierre Le Doussal, arXiv:1101.2411, Phys. Rev. Letters **106** 166803 (2011).
- [36] **Interference in disordered systems: A particle in a complex random landscape**
 Alexander Dobrinevski, Pierre Le Doussal, Kay Jorg Wiese, arXiv:1101.2411, Phys. Rev. E **83** (2011) 061116.
- [37] **Novel phases of vortices in superconductors**
 P. Le Doussal, Chapter in the book: BCS: 50 years, L.N. Cooper and D. Feldman Editors World Scientific (2011), also published in Int. Journal of Modern Physics B, **24** 20-21,pp 3855-3914 (2010).
- [38] **Avalanches in mean-field models and the Barkhausen noise in spin-glasses**
 Pierre Le Doussal, Markus Muller, Kay Jorg Wiese, arXiv:1007.2069, EPL **91** 57004 (2010).
- [39] **The Aharonov-Bohm effect in presence of dissipative environments**
 Baruch Horovitz, Pierre Le Doussal, arXiv:1006.4125, Phys. Rev. B **82**, 155127 (2010).
- [40] **The universal high temperature regime of pinned elastic objects**
 Sebastian Bustingorry, Pierre Le Doussal, Alberto Rosso, arXiv:1006.0603, Phys. Rev. B **82**, 140201 (2010) (editor's suggestion).
- [41] **Freezing Transition in Decaying Burgers Turbulence and Random Matrix Dualities**
 Yan V Fyodorov, Pierre Le Doussal, Alberto Rosso, arXiv:1004.5025, Europhysics Letters v.90 (2010) 60004.
- [42] **Free-energy distribution of the directed polymer at high temperature**
 Pasquale Calabrese, Pierre Le Doussal, Alberto Rosso, arXiv:1002.4560, EPL **90** 20002 (2010)
- [43] **Extreme value statistics from the Real Space Renormalization Group: Brownian Motion, Bessel Processes and Continuous Time Random Walks**
 Gregory Schehr, Pierre Le Doussal, arXiv:0910.4913, J. Stat. Mech. P01009 (2010).

- [44] **Elasticity of a contact-line and avalanche-size distribution at depinning**
Pierre Le Doussal, Kay Joerg Wiese, arXiv:0908.4001, Phys. Rev. E **82** 011108.
- [45] **Statistical Mechanics of Logarithmic REM: Duality, Freezing and Extreme Value Statistics of $1/f$ Noises generated by Gaussian Free Fields**
Yan V Fyodorov, Pierre Le Doussal, Alberto Rosso, arXiv:0907.2359, J. Stat. Mech. (2009) P10005.
- [46] **Universal non stationary dynamics at the depinning transition**
Alejandro B. Kolton, Gregory Schehr, Pierre Le Doussal arXiv:0906.2494, Phys. Rev. Lett. **103**, 160602 (2009).
- [47] **Sinai model in presence of dilute absorbers**
Pierre Le Doussal, arXiv:0906.0267, J. Stat. Mech. P07032 (2009).
- [48] **Height fluctuations of a contact line: a direct measurement of the renormalized disorder correlator**
Pierre Le Doussal, Kay Joerg Wiese, Sebastien Moulinet, Etienne Rolley, arXiv:0904.4156, EPL **87** 5, 56001 (2009).
- [49] **Avalanche-size distribution at the depinning transition: A numerical test of the theory**
Alberto Rosso, Pierre Le Doussal, Kay Joerg Wiese, arXiv:0904.1123, Phys. Rev. B **80**, 144204 (2009).
- [50] **Winding of planar gaussian processes**
Pierre Le Doussal, Yoav Etzioni, Baruch Horovitz, arXiv:0904.0582, J. Stat. Mech. P07012 (2009).
- [51] **Size distributions of shocks and static avalanches from the Functional Renormalization Group**
Pierre Le Doussal, Kay J. Wiese, arXiv:0812.1893, Phys. Rev. E, Volume: 79, Issue: 5 Article Number: 051106, (2009).
- [52] **Fluctuation force exerted by a planar self-avoiding polymer**
Pierre Le Doussal, Kay J. Wiese, arXiv:0812.1700, EPL, Volume: 86, Issue: 2 Article Number: 22001, (2009).
- [53] **Gauge fields, ripples and wrinkles in graphene layers**
F. Guinea, B. Horovitz, P. Le Doussal, arXiv:0811.4670, contribution to the special issue of Solid State Communications on graphene, SOLID STATE COMMUNICATIONS **149** 27-28 Special Issue: Sp. Iss. SI Pages: 1140-1143 (2009).
- [54] **Comment on "Absence of the Mott Glass Phase in 1D Disordered Fermionic Systems"**
Pierre Le Doussal, Thierry Giamarchi, Edmond Orignac, arXiv:0809.4544

- [55] **Critical interfaces in the random-bond Potts model**
 J.L. Jacobsen, P. Le Doussal, M. Picco, R. Santachiara, K.J. Wiese, arXiv:0809.3985, to appear in Phys. Rev. Letters. PHYSICAL REVIEW LETTERS, Volume: 102, Issue: 7, Article Number: 070601, (2009).
- [56] **Exact results and open questions in first principle functional RG**
 P. Le Doussal, arXiv:0809.1192. Annals of Physics **325** Number 1, 49-150 (2010).
- [57] **Driven particle in a random landscape: disorder correlator, avalanche distribution and extreme value statistics of records,**
 P. Le Doussal, K.J. Wiese, arXiv:0808.3217, PHYSICAL REVIEW E, Volume: 79, Issue: 5, Article Number: 051105, (2009).
- [58] **Time evolution of 1D gapless models from a domain-wall initial state: SLE continued?**
 P. Calabrese, C. Hagendorf and P. Le Doussal, arXiv:0804.2431, J. Stat. Mech. (2008) P07013.
- [59] **SLE on doubly-connected domains and the winding of loop-erased random walks**
 C. Hagendorf and P. Le Doussal, arXiv:0803.3249, J. Stat. Phys. 133 (2008) 231-254.
- [60] **Field theory conjecture for loop-erased random walks**
 A.A. Fedorenko, P. Le Doussal and K.J. Wiese, arXiv:0803.2357, J. Stat. Phys. 133, 805-812 (2008).
- [61] **Gauge field induced by ripples in graphene**
 F. Guinea, B. Horovitz and P. Le Doussal, arXiv:0803.1958, Phys. Rev. B vol. 77, 205421 (2008). (editor's suggestion).
- [62] **Statistics of static avalanches in a random pinning landscape,**
 P. Le Doussal, A.A. Middleton and K.J. Wiese, arXiv:0803.1142, PHYSICAL REVIEW E Volume: 79 Issue: 5 Article Number: 050101, (2009).
- [63] **Depinning in a two-layer model of plastic flow**
 P. Le Doussal, M.C. Marchetti and K.J. Wiese, arXiv:0801.0137, Phys. Rev. B 78, 224201 (2008).
- [64] **How to measure the effective action for disordered systems**
 Kay Joerg Wiese, Pierre Le Doussal, arXiv:0712.4286, Proceedings for Path Integrals 2007 PATH INTEGRALS: NEW TRENDS AND PERSPECTIVES, PROCEEDINGS Pages: 470-478, (2008).
- [65] **Cusps and shocks in the renormalized potential of glassy random manifolds: How Functional Renormalization Group and Replica Symmetry Breaking fit together**
 Pierre Le Doussal, Markus Mueller, Kay Joerg Wiese, arXiv:0711.3929, Phys. Rev. B **77** (02 2008) 064203.

- [66] **Chaos in the thermal regime for pinned manifolds via functional RG**
O. Duemmer, P. Le Doussal, arXiv:0709.1378, submitted to Phys. Rev. E (2008).
- [67] **Electromagnetic Coulomb Gas with Vector Charges and "Elastic" Potentials: Renormalization Group Equations**
David Carpentier and Pierre Le Doussal, arXiv:0707.2667, NUCLEAR PHYSICS B, Volume: 795, Issue: 3 Pages: 491-518, (2008).
- [68] **Stability of Random-Field and Random-Anisotropy Fixed Points at large N**
Pierre Le Doussal, Kay Jorg Wiese, cond-mat/0612310, Phys. Rev. Lett. 98 (2007) 269704.
- [69] **Are Domain Walls in Spin Glasses Described by Stochastic Loewner Evolutions?**
Denis Bernard, Pierre Le Doussal, A. Alan Middleton, cond-mat/0611433, Phys. Rev. B 76 (2007) 020403 (R).
- [70] **Functional Renormalization for Disordered Systems, Basic Recipes and Gourmet Dishes**
Kay Joerg Wiese and Pierre Le Doussal cond-mat/0611346, Markov Processes Relat. Fields **13** (2007), 777–818.
- [71] **Numerical Calculation of the Functional renormalization group fixed-point functions at the depinning transition**
Alberto Rosso, Pierre Le Doussal, Kay Wiese, cond-mat/0610821, Phys. Rev. B 75 (2007) 220201.
- [72] **How to measure Functional RG fixed-point functions for dynamics and at depinning**
Pierre Le Doussal, Kay Joerg Wiese, cond-mat/0610525, Europhys. Lett. 77 (2007) 66001
- [73] **Statics and dynamics of elastic manifolds in media with long-range correlated disorder**
Andrei A. Fedorenko, Pierre Le Doussal, Kay Joerg Wiese, cond-mat/0609234, Phys. Rev. E 74, 061109 (2006)
- [74] **Free Fermions, Functional RG and the Cardy Ostlund fixed line at low temperature**
Pierre Le Doussal, Gregory Schehr, cond-mat/0607657, Phys. Rev. B 75 (2007) 184401.
- [75] **Universal distribution of threshold forces at the depinning transition**
Andrei A. Fedorenko, Pierre Le Doussal, Kay Joerg Wiese, cond-mat/0607229, Phys. Rev. E 74, 041110 (2006).
- [76] **Wetting and Minimal Surfaces**
Constantin Bachas, Pierre Le Doussal, Kay Joerg Wiese, hep-th/0606247, Phys. Rev. E 75 (2007) 031601.

- [77] **Measuring functional renormalization group fixed-point functions for pinned manifolds**
A. Alan Middleton, Pierre Le Doussal, Kay Joerg Wiese cond-mat/0606160, Phys. Rev. Lett. 98 (2007) 155701.
- [78] **Finite temperature Functional RG, droplets and decaying Burgers Turbulence**
Pierre Le Doussal, cond-mat/0605490, Europhys. Lett. 76 No 3 (November 2006) 457-463.
- [79] **Interference in presence of Dissipation**
Baruch Horovitz, Pierre Le Doussal, cond-mat/0602391, Phys. Rev. B 74, 073104 (2006).
- [80] **Dynamic Compressibility and aging in Wigner crystals and quantum glasses**
L. F. Cugliandolo, T. Giamarchi and P. Le Doussal, cond-mat/0511486, Phys. Rev. Lett. 96, 217203 (2006).
- [81] **Random field spin models beyond one loop: a mechanism for decreasing the lower critical dimension**
Pierre Le Doussal, Kay Joerg Wiese, cond-mat/0510344 Phys. Rev. Lett. 96, 197202 (2006)
- [82] **Chaos and residual correlations in pinned disordered systems**
Pierre Le Doussal, cond-mat/0505679, Phys. Rev. Lett. **96** 235702 (2006).
- [83] **2-loop Functional Renormalization for elastic manifolds pinned by disorder in N dimensions**
Pierre Le Doussal, Kay Joerg Wiese, cond-mat/0501315, Phys. Rev. E 72, 035101 (2005).
- [84] **Functional Renormalization for pinned elastic systems away from their steady states**
Gregory Schehr, Pierre Le Doussal, cond-mat/0501199, Europhys. Lett., 71 (2), pp. 290-296 (2005)
- [85] **Can non-linear elasticity explain contact-line roughness at depinning?**
Pierre Le Doussal, Kay Joerg Wiese, Elie Raphael, Ramin Golestanian, cond-mat/0411652, Phys. Rev. Lett. 96, 015702 (2006).
- [86] **Specific Heat of Quantum Elastic Systems Pinned by Disorder**
Gregory Schehr, Thierry Giamarchi, Pierre Le Doussal, cond-mat/0411227, Eur. Phys. J. B 44 (2005), 521
- [87] **Disorder induced transitions in layered Coulomb gases and application to flux lattices in superconductors**
Baruch Horovitz, Pierre Le Doussal, cond-mat/0410019, Phys. Rev. B 71, 134202 (2005).
- [88] **Thermal fluctuations in pinned elastic systems: field theory of rare events and droplets**
Leon Balents and Pierre Le Doussal, cond-mat/0408048 Annals of Physics **315** 213 (2005).

- [89] **Low-temperature properties of some disordered systems from the statistical properties of nearly degenerate two-level excitations**
 Cecile Monthus and Pierre Le Doussal, cond-mat/0407289, submitted to Eur. J. Phys. (2004).
- [90] **Derivation of the Functional Renormalization Group Beta-Function at order $1/N$ for Manifolds Pinned by Disorder**
 Pierre Le Doussal, Kay Joerg Wiese, cond-mat/0406297, Nuclear Physics B **701** 409 (2004).
- [91] **Transport in Luttinger Liquids**
 T. Giamarchi, T. Nattermann and P. Le Doussal, cond-mat/0403487, Proceedings of the EURESCO Conference "Fundamental Problems of Mesoscopic Physics", Granada, Spain (Sept. 2003), to be published by Kluwer
- [92] **Aging in the glass phase of a 2D random periodic elastic system**
 Gregory Schehr and Pierre Le Doussal, Phys. Rev. Lett. **93**, 217201 (2004)
- [93] **Broad relaxation spectrum and the field theory of glassy dynamics for pinned elastic systems**
 Leon Balents and Pierre Le Doussal, cond-mat/0312338, Phys. Rev. E **69**, 061107 (2004).
- [94] **Functional Renormalization Group at Large N for Disordered Elastic Systems, and Relation to Replica Symmetry Breaking**
 Pierre Le Doussal and Kay Wiese, cond-mat/0305634, Phys. Rev. B **68**, 174202 (2003).
- [95] **Functional renormalization group and the field theory of disordered elastic systems**
 Pierre Le Doussal, Kay Wiese and Pascal Chauve, cond-mat/0304614, Phys. Rev. E. **69** (2) 026112 Part 2 (2004).
- [96] **Exact multilocal renormalization on the effective action : application to the random sine Gordon model statics and non-equilibrium dynamics**
 Gregory Schehr, Pierre Le Doussal, cond-mat/0304486, Phys. Rev. E **68**, 046101 (2003)
- [97] **Variable range hopping and quantum creep in one dimension**
 Thomas Nattermann, Thierry Giamarchi, Pierre Le Doussal, cond-mat/0303233, Phys. Rev. Lett. **91**, 056603 (2003)
- [98] **Numerical simulation evidence of dynamical transverse Meissner effect and moving Bose glass phase**
 E. Olive, J.C. Soret, P. Le Doussal, T. Giamarchi, cond-mat/0301471, Phys. Rev. Lett. **91**, 037005 (2003).
- [99] **Higher correlations, universal distributions and finite size scaling in the field theory of depinning**
 Pierre Le Doussal, Kay Joerg Wiese cond-mat/0301465, Phys. Rev. E **68**, 046118 (2003).

- [100] **Universal interface width distributions at the depinning threshold**
Alberto Rosso, Werner Krauth, Pierre Le Doussal, Jean Vannimenus, Kay Joerg Wiese
cond-mat/0301464, Phys. Rev. E 68, 036128 (2003).
- [101] **Specific heat of classical disordered elastic systems**
Gregory Schehr, Thierry Giamarchi and Pierre Le Doussal, cond-mat/0301053, Phys.
Rev. Lett. 91, 117002 (2003).
- [102] **Specific heat of the quantum Bragg Glass**
Gregory Schehr, Thierry Giamarchi and Pierre Le Doussal, cond-mat/0212300, Europhys.
Lett. 66 (2004) 538-544
- [103] **Josephson decoupling in layered superconductors with columnar defect**
A. Morozov, Baruch Horovitz and Pierre Le Doussal, cond-mat/0211080, Phys. Rev. B
67, 140505 (2003)
- [104] **Functional renormalization group for anisotropic depinning and relation to
branching processes**
Pierre Le Doussal and Kay Joerg Wiese, cond-mat/0208204, Phys. Rev. E 67, 016121
(2003)
